

凯美亚化学有限公司
KEMIACHEM CO., LIMITED.

Technical Data Sheet

Product Name	Manganese Oxide/ Electrolytic Manganese Dioxide	
Model Number	Mn25-92	
Shape	Powder	
Specification	MnO2 : 25%-92% Fe: 1-10 % P: 0.3%max SiO2: 4-18% Al2O3: 5%max Relative Density: 5.026 Molecular Weight: 86.94	
Application	MnO2 is mainly used in electrolytic zinc electrolytic lead ,ceramics,chemistry industry and Battery industry. MnO2 refers to medication(Potassium Permanganate),national defense; MnO2 is used in electronical technology,printing and dyeing,photography,ceramics,match,weld; MnO2 also can be used in wate purification,disenfactor,oxidant,catalyst,agriculture and other industries.	
Size	100-400mesh	
Packing	25kg woven bag with inner plastic bag (or according consumer's requirement)	
Delivery detail	Within 20 days after the receipt of L/C or advance payment	
Quantity /20'FCL	23-25 MTS
