Technical Data Sheet

Product name: DIANILINE DITHIOPHOSPHORIC ACID

Molecular formula: $(C_6H_5NH)_2PSSH$

Main content: Dianiline dithiophosphoric acid

Specifications:

Item	Specification
Appearance	White to faint yellow powder
N%, \geq	8.2

Application: Used as the flotation collector for lead, copper minerals with a presence of sphalerite and iron sulphide, it has a more significant effect to improve the flotation recoveries of gold and silver, it also has stronger collector ability and good selectivity.

Packaging: Iron drum, net weight 100kg / drum.

Storage: Store in a cool, dry, ventilated warehouse.

Note: According to the customers' specifications and packaging requirements.
